Building Area: 5,000 SF
Construction Cost: \$880,000
Project Status: Completed 2016

Project Description: A new district maintenance and bus garage to support the transportation needs for a district of 3,000 students.

Engineering Highlights:

Project included two single-sided access bays, which includes a four-post bus lift, and one pull-through bay for maintenance efficiency. Management support areas of the facility includes the transportation director's office, kitchenette, parts storage and pneumatic equipment control room.

HVAC System is point of use equipment. The maintenance areas utilize a building-wide ventilation system with propane heat and the management support spaces are conditioned by PTAC units.

The facility also features a building-wide pneumatic plumbing system, emergency exhaust evacuation system, emergency eye-wash station and LED exterior light fixtures.
